REAR SOLE WEIGHT

Creates a deep CG for an easy launch and greater forgiveness on off-center hits

OFFSET HOSEL

On OS model for maximum slice-fighting control

The new 460cc HL3 drivers are available in two models - standard and offset - and offer players quality engineering and performance. The forged four-piece titanium head features includes a cup face with variable face thickness (VFT) technology for maximum power and distance from more contact points on the face.

- Both models are designed with a new aerodynamic head shape with a higher MOI.
- Both models feature a deep cup face design for exceptional power.
- Precise weight placement delivers high-flying, powerful tee shots
- Slice-fighting technology in the offset model allows the face to square up at impact for a straighter ball flight.

CUP FACE DESIGN

And variable face thickness technology in the adjustable model provide maximum power from more contact points on the face

CUSTOM AFFORDABILITY

Built to your specifications including length, shaft flex and grip size.

HL3 STD DRIVER	LOFT	LIE ANGLE	VOLUME	UST MAMIYA LENGTH
9.5	9.5°	57.0°	460cc	45"
10.5	10.5°	57.5°	460cc	45"

HL3 OS OFFSET DRIVER

10.5*	10.5°	59.0°	460cc	45"
12.0	12.0°	60.0°	460cc	45"
HL	13.5°	60.0°	460cc	45"

*Also available in left hand. Women's length -1".

Custom fitting options include grip, shaft flex, and length. Headcover included.

HL3 FAIRWAY WOODS

OFFSET HOSEL
For maximum slice-fighting control

POWER CHANNEL
Behind the club face increases ball speed

SHALLOW FACE DESIGN
And variable face thickness technology provide maximum power from more contact points on the face

HL3 fairway woods feature a 450 SS hyper steel construction and variable face thickness technology to deliver exceptional forgiveness and unsurpassed distance.

- Available in standard & offset models. The offset model is designed to provide maximum slice-fighting control.
- New more aerodynamic head shape design features a lower center of gravity.
- Maraging steel face with variable face thickness technology provides powerful contact from more points on the face.
- Rear sole weight moves the center of gravity deep in the head for easy launch and increased accuracy.
- Shallow face design and low center of gravity deliver high launch and lower spin for maximum distance.

CUSTOM AFFORDABILITY

Built to your specifications including length, shaft flex and grip size.

HL3 HYBRID

VARIABLE FACE THICKNESS

Provides maximum power and distance from more contact points

REAR SOLE WEIGHTING

Creates a deep CG for an easy launch and greater forgiveness on off-center hits

The HL3 hybrid is constructed from 450 SS hyper steel and a forged maraging steel face featuring variable face thickness (VFT) technology. This construction design delivers the ultimate in forgiveness and power.

- Redesigned face is thinner for higher COR and greater distance.
- High-toe face design delivers greater forgiveness and expanded sweet spot across the face
- Low-profile face design combined with the lower center of gravity position makes this hybrid incredibly easy to launch.

SHALLOW FACE, HIGH-TOE DESIGN

Pear shape head design incorporates a shallow face with variable face thickness technology for maximum power and accuracy

CUSTOM AFFORDABILITY

Built to your specifications including length, shaft flex and grip size.

HL 3 HYBRID	LOFT	LIE ANGLE	FACE ANGLE	UST MAMIYA LENGTH

HL3 IRON-WOOD

SUPER-THIN FORGED FACE
With variable face thickness for a powerful launch

HEAVY SOLE
Positions more weight below the ball for high-flying shots

Available individually or as a complete set, the newly designed HL3 Iron-Wood series features increased head volumes for more forgiveness and a thin forged face for more spring-like effect and distance. This new Iron-Wood surpasses all hybrid expectations.

- Combines a hollow hyper steel body with a super-thin forged steel face with variable face thickness for maximum ball speed.
- Heavy sole and hollow body increases launch angle and forgiveness on every shot.

AVAILABLE INDIVIDUALLY OR AS A COMPLETE SET!

HOLLOW HYPER STEEL BODY
Maximizes stability so every shot is powerful and accurate

HL3 IRONS

TOE WEIGHT TECHNOLOGY

Creates an expanded sweet spot and maximizes stability on impact

VARIABLE FACE THICKNESS

Delivers exceptional feel and power even on off-center hits

HL3 irons incorporate an expanded undercut cavity to provide maximum forgiveness and consistent performance. Featuring advanced toe weighting, the soft 431 stainless steel design provides great accuracy and feel for players of all levels.

- Vast undercut cavity allows weight to be moved away from the face and into the sole for a higher MOI, launch angle, and enhanced forgiveness.
- Notch hosel featured in the 3 through 7-irons removes weight from the heel and repositions it to the toe, elongating the sweet spot for unsurpassed forgiveness.
- 8-iron through PW feature a more traditional set up designed to deliver exceptional feel and control on approach shots.

DEEP UNDERCUT CAVITY

Delivers maximum forgiveness and consistent power on every shot

CUSTOM AFFORDABILITY

Built to your specifications including length, shaft flex and grip size.

Hot Launch Super Spin wedge is designed to give players the perfect touch around the green. Computer milled grooves will give you perfect control, no matter what kind of lie you have.

Tour Edge engineers took great care in formulating the shape and design of the Super Spin wedge. The Super Spin's beveled leading edge makes this an exceptionally versatile wedge. The cambered sole is more rounded for minimal turf interaction from any lie.

TOE WEIGHT TECHNOLOGY
Creates an expanded sweet spot and maximizes stability on impact
